

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

University of Virginia Summer Quarter

First Term, June 20---July 30
Second Term, August 1---September 3, 1921

Courses for Elementary Teachers
Courses for High School Teachers
Courses for College Credit

The Summer Quarter is an integral part of the University Year, the courses in the College of Arts and Sciences being the same in character and in credit value as in the other quarters of the year. In the Department of Education many professional courses for elementary and high school teachers are given to meet certificate requirements which are not offered in the regular session. The Summer Quarter is divided into two terms for the accommodation of those who can give only six weeks to the work but who desire University credit. Students may enter for either term or both.

Degrees are conferred upon men and women for summer work.

The Masters' Degree may be obtained in three Summer Quarters.

Several hundred different courses offered.

The most beautiful and unique campus in America.
Pleasant Summer Climate.

Comfortable accommodations at reasonable rates.

Entertainments, excursions, Music Festival.

For illustrated folder and announcement, write,

CHAS. G. MAPHIS, *Dean*

UNIVERSITY, VA.

The University of Tennessee Summer School 1921

(Formerly Summer School of the South)

FULL SESSION, TWELVE WEEKS

First Term, June 13 to July 21; Second Term,
July 22 to August 31.

A wide range of courses in **Methods** for **Kindergarten, Primary and High School Teachers, College Entrance and College Credit**, including the **Arts, Engineering, Home Economics, Agriculture** and etc. All courses count for **College Credit or College Entrance**.

Popular lectures and entertainments.

Unexcelled summer climate in the hills of East Tennessee. Average daily temperature for July 1920, 76 degrees.

Improved dormitory facilities. New academic buildings. Room reservations should be made early.

Write for **Preliminary Announcement or for General Catalog**.

Address,

NORTH CAROLINA COLLEGE FOR WOMEN SUMMER SESSION

JUNE 15—JULY 27, 1921

Organized academic and professional courses for high school teachers carrying both college and certification credit offered by most departments of the College. Post-graduate courses will be offered by some departments.

General Science courses will be organized in accordance with the plan of the State High School Inspector to prepare more science teachers.

Prof. F. C. Landsittel, well-known author of Educational Publications, High School Visitor, and Professor of Education in one of our largest western state universities, will be at the College for the full six weeks for courses in Supervision and Secondary Education. Other courses for **principals** and **supervisors** will be offered by regular members of the College faculty. Find out about our plan of training experienced teachers for supervisors by Field Work, Summer Terms, and part Winter Periods.

Courses in Community Organization, Recreation, Tests and Measurements, School Sanitation and Child Hygiene, and Educational Psychology offered to supplement other courses for principals, supervisors, and high school teachers.

Rural and city elementary teachers will find **Content and Method** courses carefully organized to meet their special needs.

Convenient and comfortable quarters. Entire expenses for term only \$42.00. For dormitory reservations or for further information, write,

JOHN H. COOK, *Director*

GREENSBORO, N. C.

FOR HIGH SCHOOLS

A Project-Method for Algebra and for Community Civics

Loose-Leaf Outlines of

ALGEBRABy **ROBERT R. GOFF**

Director of Mathematics, Academic High School, New Britain, Conn.

A new addition to our series of outlines in other subjects. The aim of this Algebra Outline, which is to be used by the pupils, is to help the student:

1. Organize the material.
2. Separate essentials from non-essentials.
3. Emphasize fundamentals and methods.
4. Summarize related facts and processes.

Noticeable results of the use of these outlines are:

1. They increase interest, as work done with them is the pupil's own creation.
2. They make a reference book which the pupils know how to use.
3. Their use develops habits of systematic effort.
4. They give a clear view of each topic as a whole.
5. The percentage of failures is reduced.

Price: complete with loose-leaf covers, 50c.

THE PALMER COMPANY

Loose-Leaf

OUTLINES OF COMMUNITY CIVICSBy **MAUD ELMA KINGSLEY, A.M.** and
FRANK HERBERT PALMER, A.M.

Elementary:

Outline 1. For Towns and Rural Schools, 30c.

Outline 2. For Cities, 30c.

Advanced:

Outline 3. For both Towns and Cities, 30c.

The aim of these Outlines is to select the facts that are really essential, aid the pupil in acquiring a first hand knowledge of his own community, and make him conscious of his responsibility for the common welfare. He is encouraged to collect information, pictures, printed matter, etc., relating to his community life, in town, state or nation. This can be gathered from many sources—local papers and magazines, town reports, photographs, postcards, etc. Original sketching and composition work is encouraged. The material gathered is fastened with the Outlines, within the Loose-leaf covers for permanent preservation. It is first discussed in the class and approved by the teacher. The plan gives scope for originality and stimulates ambition. No other text-book of Civics is necessary. The Outline suffices. The plan is thus economical. Loose-leaf covers punched and eyeleted to receive the Outlines, 30 cents.

TWENTY YEARS EXPERIENCE IN PLAN-
NING SCHOOL AND COLLEGE
BUILDINGS**The Outline of History**

H. G. Wells

Being a Plain History of Life and Mankind in Two Volumes

The educated man is supposed to know "what has taken place on this planet before his own arrival, to understand the growth and nature of civilization and its institutions, and above all to understand his own potentialities, his own kinship to the rest of mankind, and the ever developing political unity of mankind."

Mr. Wells in 1200 fascinating pages of his Outline of History, has made this information not only concretely accessible, but actually irresistible for the reading public. He floods vast arid spots of ignorance with a fresh, vital treatment of historical material long buried in the ponderous tomes of specialists; he co-ordinates and hands back to us in usable form that which we did not know.

PACKARD FALLING BODY APPARATUS

The only design on the market on which the falling body traces a permanent record direct on the note-book page.

Designed by John C. Packard
of the Brookline (Mass.) High School

No. 25---100

Patented December 17, 1907

The simplest and most direct method of determining the curve resulting from a uniform motion acting simultaneously with a uniform accelerated motion, and of deriving therefrom the laws of falling bodies.

A steel sphere is the body to be acted upon, the curve of its path being automatically traced by means of a special sensitized carbon sheet placed over co-ordinate paper especially designed to give by direct reading the time units on the horizontal line and the distance of fall on the vertical line. The falling body makes its permanent record on the note-book page.

A plate glass bed insures a plane surface for the ball to roll over. The adjusting legs, level, releasing trough and full set of especially designed, easily operated clamps render the instrument readily operated by the most inexperienced student.

This instrument can be set up and adjusted and a curve obtained in a very few minutes. As the curve is automatically traced on the special co-ordinate paper of standard note-book size, punched for binding in the loose-leaf note-book, it becomes part of the student's permanent laboratory record, from which he easily derives the laws of falling bodies. The entire exercise when taken with this instrument becomes fascinating and valuable.

Mr. Packard has prepared directions which Messrs. Turner and Hersey have edited as Experiment M332, NATIONAL PHYSICS DIRECTION SHEET, one of which is sent with each instrument.

Price, with 12 sheets special co-ordinate paper and 2 sheets sensitized carbon paper, \$16.50.
